

If you have already completed the following procedure, reset the robot vacuum by setting the red switch on the side of the robot to 'off' for at least ten minutes.

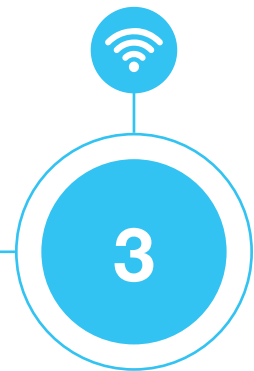

APP INSTRUCTION XPOWER+

Make sure the robot is fully charged.

Remove the robot from the docking station (charger).

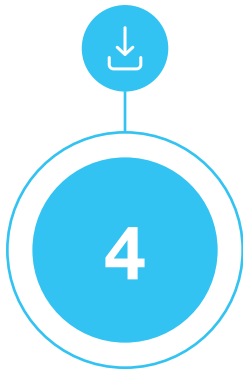

Place the robot close to your router.

It is not possible to register the robot in the app while it is physically in the docking station.

Need assistance?

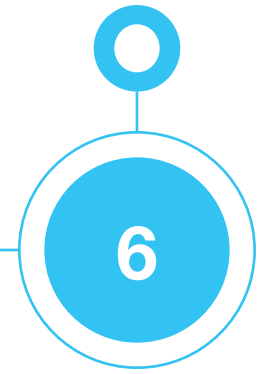

Download the app for your specific robot.

(Bluebot Robotics app for the XPOWER+)

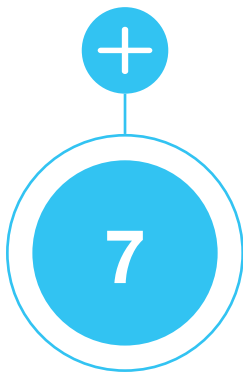

Make sure your phone is connected to the Wi-Fi network.

Open the app and register yourself; select 'Europe' as your area.

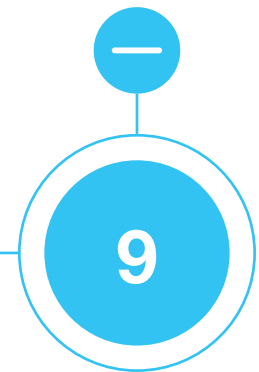

Please note that the robot works on a frequency of both 2.4 & 5.0 GHz.

Click the '+' to add the robot.

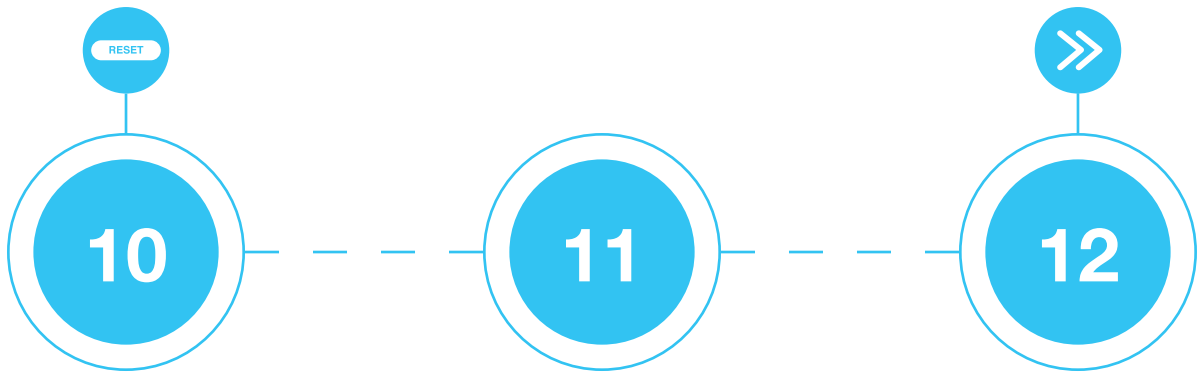

Select the robot model you have (bluebotXP+)

Make sure the on/off switch is set to 'on'. This is the red switch on the side of the robot.

Need assistance?

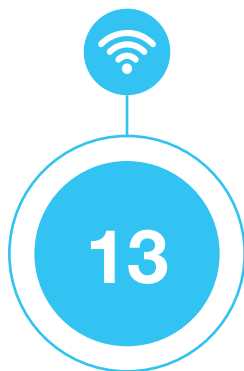

Wait until the robot has started fully.

(XPOWER+)
Press and hold the button on the top until it begins to blink.

Continue to the next step in the app.

Use the blue button to 'Reset'.

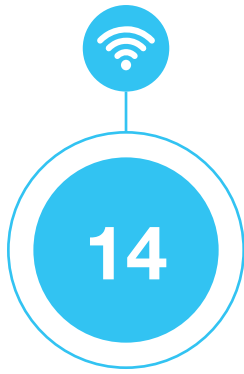

Select your Wi-Fi signal.

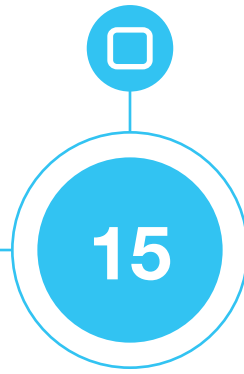

The robot works on both
2.4 & 5.0 GHz

Need assistance?

Enter your password for Wi-Fi connection.

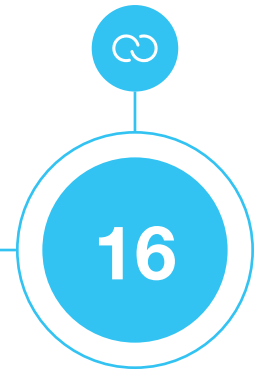

Press the 'home' button on your phone and go to the Wi-Fi settings.

Select the network that begins with *blaupunkt_*; return to the app.

For Android phones: Do NOT use the "Back" button, use the "Home" button instead.

The app will now connect to the robot.

Hold the telephone in close proximity to the robot.

If you have been successful, your robot will now be displayed in the app.
